Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

Amazon Web Services (AWS) is a cloud computing platform provided by Amazon that offers various services over the internet. It allows users to access computing power, storage, databases, networking, security, and other IT resources without purchasing physical hardware.

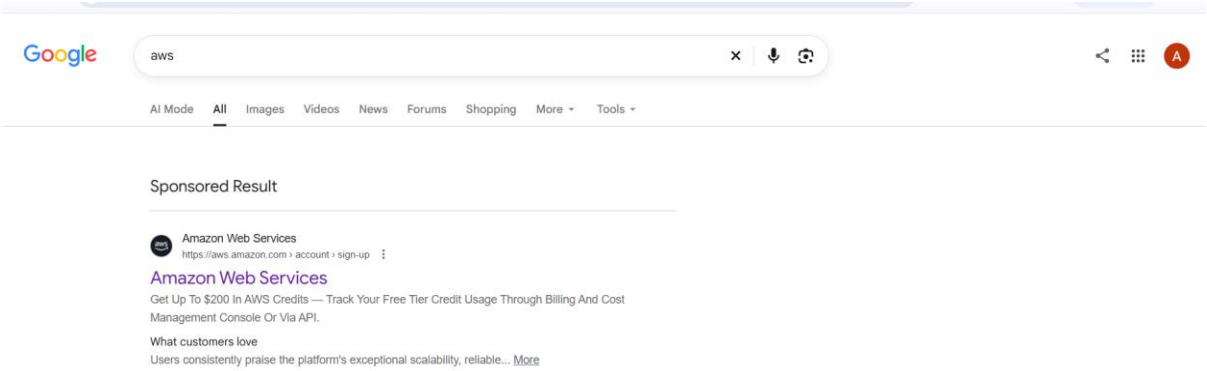

AWS provides an easy-to-use web interface called the AWS Management Console, through which users can create, configure, monitor, and manage different cloud services.

The AWS Free Tier is designed to help beginners, students, and developers explore AWS services with limited free usage. It allows users to learn cloud computing concepts and experiment with different services without making large initial investments. However, free usage is subject to eligibility, service limits, and applicable terms. Some services may incur charges.

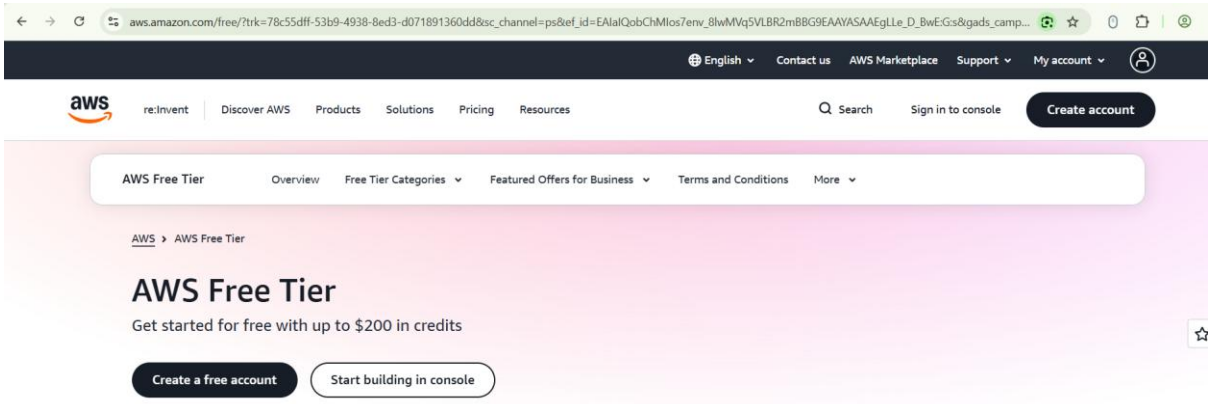

Steps:

1.Open the AWS Website. Open a web browser (Chrome/Edge recommended).

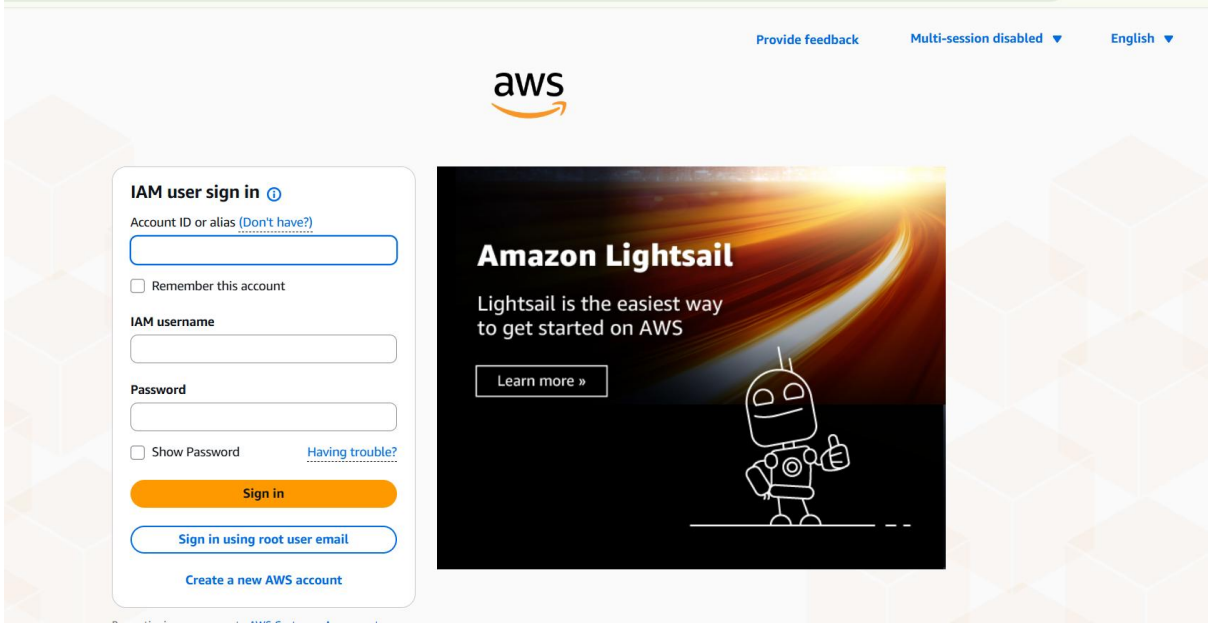

Go to: https://aws.amazon.com/free

2.Click Sign in to console

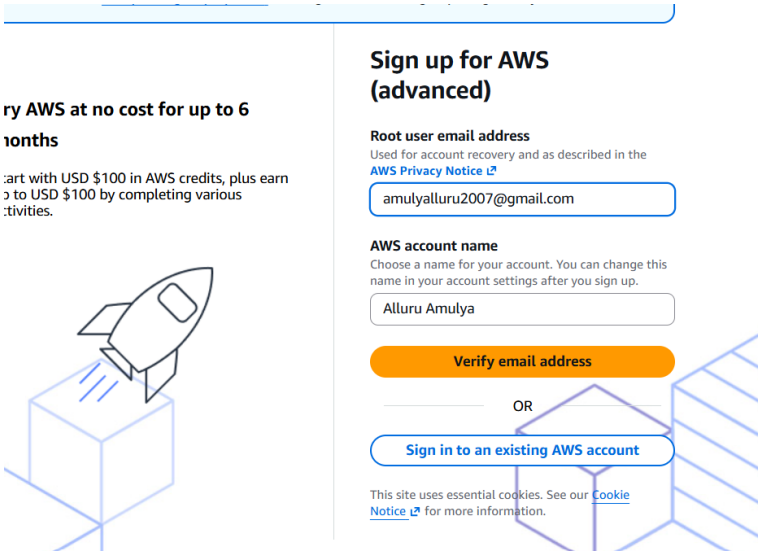

3.Click Create a new AWS account.

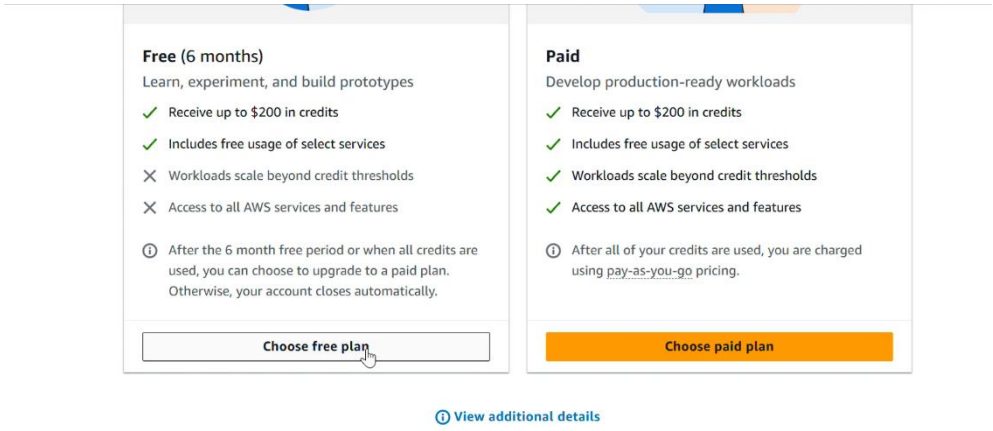

4. Enter the following details:

- Email address
- Password
- AWS Account Name (e.g., StudentAWSAccount)

5.Click Verify email address and enter the OTP sent to your email.

6.Choose your Account plan Free(6 months)-click Choose Free plan

7.Give all contact information. Enter personal details:

- Full name
- Phone number
- Address……..Click agree and continue

8.In the next steps provide Billing information

You can choose UPI or Debit/Credit Card option and accordingly give the details. If UPI (Automatic Payment limit 15000 should be there) just for authorization later autopay can be deleted

9.In the next step Confirm your Identity.

Choose primary purpose of Acount registration as Academic,

Ownership type as Individual

Document type as AADHAR…verification to be done through digilocker

Or voter id or driving license also can be provided….then click continue

10.Provide Mobile number and click send SMS…..

Enter code for verification..continue

11.Setting up of AWS account.(around 1 to 2 mins)

12.AWS Management Console dashboard is visible.

or Login at: https://console.aws.amazon.com. and then sign in using root user email. (Sign in using your registered credentials)

Output:
